To Whom It May Concern:

Re: School Banking Program

I provide support, run workshops and audit the reporting of school base funds within the Grand Erie DSB.

Prior to the implementation of school banking, school secretaries really struggled to maintain financial reporting and accurate bank balances.

During the implementation of School Banking, the schools secretaries enjoyed the personalized training and found the program easy to learn. School Banking is a user-friendly system that truly has been customized for this group of users.

This company's staff is excellent! They are very quick to respond to any technical support issues or requests for enhancements. Last February, I volunteered to be a member of their Product Advisory Committee that meets quarterly with the management team to make recommendations and support their continuous improvement efforts.

When changes in ministry guidelines required additional reports, KEV Software helped us adapt our system to the new requirements. School Banking has made the schools financial records more accurate and more accountable.

I feel that the web-based version would offer even better visibility and an increased level of support at the board office. I will continue to push our board to move towards this web-based solution.

If you require any additional testimony, please contact me at (519) 756-6301 ext: 128.

Sincerely,

Tammy Kerr
Budget Assistant
